PROFESSIONAL SUMMARY

Frontend-focused developer and final-year Computer Science student with strong experience in building responsive, user-centered web applications. Skilled in structuring scalable interfaces, optimizing performance, and delivering clean, maintainable code. Adept at translating design concepts into functional solutions with a focus on usability and efficiency.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript, Responsive Design

Backend & Programming: Python, PHP, Django

Database: MySQL, MariaDB

Tools & Workflow: Git, GitHub, VS Code, XAMPP

Core Strengths: UI/UX Structuring, Performance Optimization, Clean Code Practices

EDUCATION

B.Sc. Computer Science (Technology) – Babcock University (Final Year)

PROJECT EXPERIENCE

Noirline Project

- Designed a modern frontend application focused on UI clarity and consistency
- Improved visual hierarchy and readability by ~35%
- Optimized structure, increasing perceived performance by ~20%
- Implemented responsive design across 3+ device breakpoints
- Technologies: HTML5, CSS3, JavaScript

Cara Project

- Built a responsive multi-page web application with improved navigation flow
- Reduced user navigation effort by ~30% through structured layouts
- Enhanced interactivity using JavaScript features
- Ensured cross-device consistency
- Technologies: HTML5, CSS3, JavaScript

The Code Center

- Developed a structured training platform interface focused on usability
- Improved content clarity and engagement by ~40%
- Applied modular CSS and semantic HTML for scalability
- Designed responsive layouts for multiple screen sizes
- Technologies: HTML5, CSS3
